

Maztaa — Terms of Service

Last Updated: 25 August 2026

Welcome to **Maztaa**.

These Terms of Service ("Terms") govern your use of the Maztaa website and your purchase or use of Maztaa's web design, web development, and related digital services.

By purchasing a Maztaa service, submitting a project request, or engaging Maztaa for a project, you agree to these Terms and any applicable Project Agreement, Statement of Work, pricing information, and policies referenced by these Terms.

If you do not agree to these Terms, please do not purchase or use our services.

1. About Maztaa

Maztaa is an independent web design and development studio that creates custom websites and digital experiences for businesses.

Depending on the selected plan or project, Maztaa may provide services including:

- Custom website design
- UI/UX design
- Responsive website development
- Frontend development
- Backend development
- CMS implementation
- Database integration
- Authentication
- API integrations
- Booking systems
- Dashboards and portals
- E-commerce and checkout systems
- SEO and performance optimization
- Website deployment
- Website maintenance
- Custom web applications

The exact services included in a project depend on the selected plan and agreed project scope.

2. Acceptance of These Terms

By purchasing a Maztaa service or entering into a project with us, you confirm that:

1. You have read and understood these Terms.
2. You have reviewed the applicable plan, pricing, and features.
3. You agree to the applicable payment structure.
4. You will provide accurate information required for the project.
5. You have the necessary rights to provide any content, images, logos, trademarks, or other materials supplied to Maztaa.
6. You have authority to enter into the agreement if you are purchasing on behalf of a business or organization.

3. Services and Pricing Plans

Maztaa offers predefined website-development plans as well as custom development services.

The currently active plans displayed on the website include:

Starter — \$800

Designed for local businesses and professionals seeking a modern digital presence.

Professional — \$1,500

Designed for growing businesses requiring additional functionality, advanced UX, CMS capabilities, backend/API functionality, and integrations.

The features included in each plan are displayed on the Maztaa website.

Certain plans or services may be displayed on the website as unavailable or under development. A plan is not considered available for purchase until Maztaa makes the relevant checkout or purchasing option available.

The current website configuration identifies Starter and Professional as active plans, while Business Pro and Enterprise/Custom are currently commented out/unavailable.

4. Plan Features

Each plan includes only the features specifically marked as included for that plan.

Features may include:

- Custom website pages
- Responsive mobile and tablet design
- Custom brand-based UI/UX
- Contact and inquiry systems

- Click-to-call and WhatsApp integration
- Google Maps integration
- Social media integration
- CMS/content management
- SEO setup
- Performance optimization
- Domain connection and deployment
- SSL and security configuration
- Backend/API development
- Supabase database integration
- User authentication and Google Login
- Third-party API integrations
- Post-launch support

Higher-level features may not be included in lower-tier plans.

The feature comparison displayed on the Maztaa website determines what is included in each currently available plan.

5. Project Scope

The scope of each project is determined by:

- The selected plan;
- The features included in that plan;
- Information provided during onboarding;
- The client's requirements;
- Any additional requirements agreed in writing;
- Any applicable Project Agreement or Statement of Work.

Features or services not included in the selected plan are not automatically included simply because Maztaa is technically capable of providing them.

Additional requirements may be quoted separately.

6. Custom Development

Maztaa creates websites around the client's business, brand, content, audience, and goals.

The level of customization depends on the selected plan.

Maztaa may use established frameworks, libraries, open-source software, reusable components, and development resources when appropriate.

The use of such technologies does not mean that the client's final website is simply a generic template.

7. Third-Party Technologies and Services

Maztaa may use technologies including:

- React
- Next.js
- Tailwind CSS
- Framer Motion
- Supabase
- Vite
- PostgreSQL
- Vercel
- GitHub
- Google services
- Other appropriate technologies

The technology stack may vary depending on project requirements.

Third-party services remain subject to their own terms, privacy policies, availability, pricing, and technical limitations.

Maztaa is not responsible for changes, outages, service interruptions, pricing changes, limitations, or discontinuation of third-party services outside Maztaa's reasonable control.

8. Domain, Hosting, and Third-Party Costs

Maztaa can assist with connecting a client's domain and deploying the website to an appropriate hosting environment.

Unless specifically stated otherwise in the selected plan or Project Agreement:

- Domain registration is not automatically included.
- Domain renewal fees are not automatically included.
- Hosting fees are not automatically included.
- Third-party software fees are not automatically included.
- Usage-based API fees are not automatically included.

- Premium plugins, assets, or external services are not automatically included.

The website's current wording refers to **Domain Connection & Deployment**, rather than guaranteeing free domain registration or unlimited hosting.

The client is responsible for applicable third-party renewal and subscription charges unless otherwise agreed in writing.

9. Payment Structure

Unless otherwise agreed in writing, Maztaa projects follow a three-milestone payment structure.

Milestone 1 — 40%

The first 40% payment is required to begin the project.

This payment allows Maztaa to begin the agreed discovery, planning, design, development setup, and related initial work.

Milestone 2 — 30%

The second 30% payment becomes due after the agreed development milestone has been completed and the client has been given an opportunity to review the functional build.

Milestone 3 — 30%

The final 30% payment becomes due before final launch and applicable project handover.

For the current active plans:

Starter — \$800

- 40% — \$320
- 30% — \$240
- 30% — \$240

Professional — \$1,500

- 40% — \$600
- 30% — \$450
- 30% — \$450

These amounts correspond with the current payment structure displayed in the Maztaa website configuration.

10. Payment Processing Through Whop

Maztaa currently uses **Whop** for applicable checkout and payment processing.

Depending on the project, Maztaa may provide:

- A full-payment checkout;

- A 40% initial milestone checkout;
- Separate payment arrangements for subsequent milestones.

The applicable payment method may vary by plan or project.

Payment through Whop does not remove or change the client's obligations under these Terms or the applicable Project Agreement.

Whop's own terms and policies may also apply to payments processed through its platform.

11. Project Commencement

Maztaa will generally begin work after:

1. The applicable initial payment has been successfully received;
2. Required project information has been provided;
3. The project scope has been established;
4. Maztaa has sufficient information to begin development.

If required information or access is missing, the project start date may be delayed.

12. Client Responsibilities

The client is responsible for providing the information and materials reasonably required for the project.

This may include:

- Business information;
- Logo and brand assets;
- Images;
- Website copy;
- Product or service information;
- Pricing;
- Contact information;
- Domain information;
- Required account access;
- Feedback;
- Approvals;
- Other project-specific materials.

Maztaa's process includes discovery, design, development, review, and launch.

13. Client-Provided Content

The client is responsible for ensuring that materials supplied to Maztaa are accurate and lawful.

The client must have the necessary rights, permissions, or licenses to use materials supplied to Maztaa, including:

- Images;
- Logos;
- Videos;
- Text;
- Fonts;
- Trademarks;
- Product information;
- Other intellectual property.

The client is responsible for claims arising from materials that it provides without the necessary rights or permissions.

14. Technical Access and Credentials

Where access to third-party services is required, clients should provide access through invitations, roles, or appropriate account-permission systems whenever possible.

Clients should avoid sharing passwords, two-factor authentication codes, recovery codes, or private API keys through ordinary communication channels.

Maztaa will request only the access reasonably necessary to perform the agreed work.

The client remains responsible for maintaining ownership and control of its third-party accounts unless otherwise agreed.

15. Project Timeline

Project timelines are estimates and depend on:

- Project scope;
- Selected plan;
- Client responsiveness;
- Availability of required content;
- Feedback and approval times;
- Number and complexity of revisions;

- Third-party integrations;
- Technical circumstances.

The current website provides the following general estimates:

- **Starter:** approximately 1–2 weeks
- **Professional:** approximately 2–3 weeks
- **Business Pro:** approximately 3–4 weeks when available
- **Custom projects:** based on the agreed scope

These estimates are not guaranteed completion dates.

Client-caused delays may extend the project timeline.

16. Project Process

Maztaa generally follows five stages:

01 — Discover

Understanding the client's goals, audience, competitive positioning, and technical requirements.

02 — Design

Creating wireframes, visual direction, high-fidelity designs, and interaction concepts.

03 — Develop

Building the agreed website using the selected technical approach.

04 — Review

Reviewing the functional build and addressing agreed feedback.

05 — Launch

Deploying the website, configuring the domain where applicable, verifying relevant configuration, and completing the agreed handover.

This process reflects the workflow currently presented on the Maztaa website.

17. Revisions

Each project may include a defined revision allowance according to the selected plan or Project Agreement.

Revisions cover reasonable changes to the agreed design or functionality.

Revisions do not automatically include:

- Complete redesigns;
- New website concepts;

- New pages outside the agreed scope;
- New functionality;
- New integrations;
- Major changes to previously approved work;
- Requirements introduced after development has substantially progressed.

Additional work may require a separate quote.

18. Client Review and Approval

The client is expected to review project deliverables and provide clear feedback within a reasonable period.

Feedback should relate to the agreed project scope.

If the client approves a design, feature, or milestone and later requests substantial changes to the approved work, the additional work may be treated as out-of-scope work.

19. Launch and Deployment

Before launch, Maztaa may perform applicable:

- Quality assurance;
- Responsive testing;
- Cross-device validation;
- Performance checks;
- SEO metadata configuration;
- Domain configuration;
- Production deployment;
- Handover preparation.

The current Maztaa workflow identifies domain connection, SEO/analytics setup, and codebase handover as launch-stage activities.

20. Final Payment and Handover

The final 30% payment is due before final launch and applicable project handover.

After full payment has been received, Maztaa will provide the agreed final deliverables according to the applicable Project Agreement.

Depending on the project, handover may include:

- Production website;
 - Source code;
 - Applicable repository access;
 - Documentation;
 - Domain configuration information;
 - Other agreed deliverables.
-

21. Intellectual Property and Ownership

Unless otherwise agreed in writing, after full payment has been received, ownership or applicable usage rights in the agreed final project deliverables will be transferred to the client as specified in the applicable Project Agreement.

Maztaa retains ownership of its pre-existing intellectual property and reusable development resources, including:

- Pre-existing code;
- Reusable components;
- Internal tools;
- Frameworks;
- Templates;
- Development methods;
- General technical know-how;
- Reusable design or development systems.

Third-party and open-source software remains subject to its respective license.

The transfer of the final project deliverables does not automatically transfer ownership of third-party software, libraries, frameworks, or services.

22. Portfolio Rights

Unless otherwise agreed in writing, Maztaa may display completed project work in its portfolio, website, case studies, presentations, or marketing materials after the project has been publicly launched.

Maztaa may display reasonable examples of:

- Website designs;
- Screenshots;
- Publicly available pages;

- Project descriptions;
- Technologies used.

If a client requires confidentiality or does not want its project displayed publicly, this should be agreed in writing before or during the project.

23. Third-Party Intellectual Property

Third-party assets and technologies may be incorporated into a project where appropriate.

Examples include:

- Open-source libraries;
- Fonts;
- Icons;
- Stock images;
- APIs;
- Software services;
- Authentication providers;
- Hosting platforms.

Such materials remain subject to their applicable licenses and terms.

Maztaa does not transfer ownership of third-party intellectual property that it does not own.

24. Website Content and Legal Compliance

The client is responsible for ensuring that its business website complies with laws applicable to its business.

Depending on the website, the client may be responsible for providing or maintaining:

- Privacy policies;
- Cookie notices;
- Terms and conditions;
- Refund policies;
- Business disclosures;
- Product information;
- Legal notices;
- Industry-specific disclosures.

Maztaa may implement technical components or pages requested by the client, but technical implementation does not constitute legal advice or guarantee legal compliance.

25. Client-Customer Data

Some projects may include functionality such as:

- Contact forms;
- Booking systems;
- User accounts;
- Authentication;
- Databases;
- Customer portals.

If a client's website collects personal information from its customers, the client is generally responsible for determining the lawful purpose and manner of collecting and using that information.

Where Maztaa processes personal information on behalf of a client, additional contractual arrangements may be required depending on the project and applicable law.

26. Third-Party Service Availability

Some website functionality may depend on external services.

Examples include:

- Vercel;
- GitHub;
- Supabase;
- Google services;
- Domain registrars;
- Payment providers;
- APIs;
- Other third-party services.

Maztaa will make reasonable efforts to integrate and configure these services as agreed.

However, Maztaa cannot guarantee uninterrupted availability of third-party services.

27. Website Performance and Compatibility

Maztaa aims to create fast, responsive, and accessible websites.

We perform reasonable testing across common device and browser environments.

However, we cannot guarantee identical performance or appearance across every:

- Device;
- Browser;
- Operating system;
- Network;
- Third-party service;
- Future software version.

Performance may also depend on third-party services, hosting, content, media files, APIs, and client-controlled changes.

28. SEO

Where SEO is included in a selected plan, Maztaa may provide technical SEO implementation such as:

- Metadata;
- Page structure;
- Performance optimization;
- Search-engine-friendly implementation;
- Relevant configuration.

SEO implementation does **not** guarantee:

- A specific Google ranking;
- A specific traffic level;
- A specific number of leads;
- A specific search position;
- A specific business outcome.

Search-engine algorithms and rankings are controlled by external search engines.

29. Analytics and Conversion Tracking

Where analytics or conversion tracking is included in a plan, Maztaa may configure the applicable tools.

Analytics data and reporting may depend on:

- Third-party platforms;
- Tracking configuration;

- Browser settings;
- Cookie consent;
- Client configuration;
- Changes to external services.

Analytics implementation does not guarantee a specific increase in conversions or revenue.

30. Post-Launch Support

Where post-launch support is included in the selected plan, the support period begins after the website has launched.

Support generally covers issues related to the delivered project.

Support does not automatically include:

- New features;
- New pages;
- Major redesigns;
- New integrations;
- Ongoing content management;
- Marketing campaigns;
- SEO campaigns;
- New functionality.

Such work may be arranged separately.

The currently active plans include post-launch support as shown in their feature lists.

31. Ongoing Maintenance

Ongoing maintenance is separate from the initial website-development project unless explicitly included in the selected plan or Project Agreement.

Maintenance may include:

- Content updates;
- Technical updates;
- Bug fixes;
- Performance improvements;
- Minor design changes;
- Monitoring;

- New functionality.

Maintenance pricing and scope may be agreed separately.

32. Cancellation and Refunds

Cancellations and refunds are governed by the **Maztaa Refund & Cancellation Policy**, together with the applicable Project Agreement and applicable law.

Refund eligibility may depend on:

- The project stage;
- Work already completed;
- Third-party costs;
- Payments already made;
- The applicable agreement;
- Applicable consumer-protection law.

Nothing in these Terms is intended to remove or restrict rights that cannot legally be excluded.

The applicable Refund & Cancellation Policy forms part of the overall Maztaa service terms.

33. Client Inactivity

The client is expected to provide required information, feedback, approvals, and decisions within a reasonable timeframe.

If the client becomes unresponsive, Maztaa may pause the project until the required information or feedback is received.

If a project remains inactive for an extended period, Maztaa may treat the project as paused or inactive.

Any restart may require a revised timeline and, where applicable, additional work or costs.

Refunds relating to inactive or cancelled projects are handled according to the Refund & Cancellation Policy and applicable law.

34. Suspension of Services

Maztaa may temporarily suspend work where:

- A required payment has not been received;
- Required client information is unavailable;
- The project requires clarification;
- The client requests a pause;

- Continuing the work would create a legal, security, or technical concern;
- A third-party service required for the project becomes unavailable.

Maztaa will make reasonable efforts to communicate significant project suspensions.

35. Prohibited Use

Clients must not use Maztaa's services to create or distribute websites or applications that:

- Violate applicable law;
- Facilitate fraud;
- Distribute malware;
- Infringe intellectual-property rights;
- Facilitate unauthorized access;
- Promote illegal activities;
- Misuse personal information;
- Deceive users;
- Facilitate harmful or abusive activities.

Maztaa may refuse or suspend work where a project reasonably appears to involve unlawful or harmful activity.

36. No Guarantee of Business Results

Maztaa builds websites and digital experiences designed to support business objectives.

However, Maztaa does not guarantee:

- Revenue;
- Sales;
- Leads;
- Search rankings;
- Advertising performance;
- Conversion rates;
- Customer growth;
- Business profitability.

Business results depend on many factors outside Maztaa's control.

37. Warranties and Service Quality

Maztaa will perform agreed services with reasonable care and skill.

If a delivered project contains a legitimate issue within the agreed scope, the client should raise the issue through the applicable support channel so that Maztaa can investigate and, where appropriate, correct it.

Nothing in these Terms excludes consumer rights or other rights that cannot legally be excluded.

38. Limitation of Liability

To the extent permitted by applicable law, Maztaa will not be responsible for indirect, incidental, special, consequential, or unforeseeable losses arising from the use of a website or service.

This may include losses relating to:

- Lost profits;
- Lost revenue;
- Lost business opportunities;
- Loss of data;
- Business interruption;
- Third-party service failures.

Nothing in these Terms limits liability where such limitation would be unlawful, including liability that cannot legally be excluded or restricted.

39. Third-Party Links

Maztaa websites and client projects may contain links or integrations to third-party websites and services.

Maztaa is not responsible for the content, availability, security, or privacy practices of third-party websites.

Third-party services are governed by their own terms and policies.

40. Confidentiality

Maztaa will take reasonable steps to keep confidential information provided for the purpose of a project confidential.

Confidential information does not include information that:

- Is publicly available;
- Was already lawfully known;

- Becomes publicly available without breach of these Terms;
- Must be disclosed by law;
- Is independently developed without use of the confidential information.

For projects requiring additional confidentiality obligations, the parties may enter into a separate confidentiality agreement.

41. Communication and Support

Maztaa currently provides customer and project support through its designated **Whop Support Chat**.

The current support channel is:

Maztaa Support Chat

Clients should use the designated support channel for project-related questions, support requests, and applicable service communications.

Maztaa may introduce additional communication channels in the future.

42. Electronic Communications

By purchasing Maztaa services or communicating with us electronically, you agree that electronic communications may be used for:

- Project communications;
- Payment information;
- Approvals;
- Project updates;
- Support;
- Legal notices;
- Policy updates;
- Other service-related communications.

Electronic records may be used to document project decisions and approvals where appropriate.

43. Changes to Services

Maztaa may update, improve, modify, suspend, or discontinue parts of its website or services.

Changes to an existing purchased project will not intentionally remove agreed deliverables without appropriate communication or an applicable remedy.

44. Changes to These Terms

Maztaa may update these Terms from time to time.

Changes may be made because of:

- Changes to our services;
- Changes in technology;
- Changes in applicable law;
- Changes to payment providers;
- Changes to business operations;
- Changes to project processes.

The latest version will be published on the Maztaa website.

The **Last Updated** date indicates when the Terms were most recently revised.

Where required by law, appropriate notice will be provided for material changes.

45. Relationship With Other Policies

These Terms should be read together with the other applicable Maztaa policies and agreements, including:

- **Privacy Policy**
- **Refund & Cancellation Policy**
- **Project Agreement / Statement of Work**

Where a specific Project Agreement contains project-specific terms that conflict with these general Terms, the project-specific terms may govern that particular matter, provided they are expressly agreed by the parties and do not conflict with mandatory law.

46. Governing Law

These Terms will be governed by the laws applicable to the Maztaa business entity and the applicable contractual relationship, subject to any mandatory consumer-protection laws that apply to the client.

Nothing in these Terms is intended to prevent a consumer from exercising mandatory legal rights available in their country or jurisdiction.

47. Severability

If any provision of these Terms is determined to be invalid, unlawful, or unenforceable, that provision will be interpreted or modified to the minimum extent necessary to make it enforceable where legally permitted.

The remaining provisions will continue to apply.

48. No Waiver

If Maztaa does not immediately enforce a provision of these Terms, this does not mean that Maztaa has permanently waived its right to enforce that provision later.

49. Entire Agreement

These Terms, together with the applicable:

- Project Agreement;
- Statement of Work;
- Selected pricing plan;
- Refund & Cancellation Policy;
- Privacy Policy;
- Other expressly agreed project documents;

form the agreement governing the relevant Maztaa service.

50. Contact and Support

For service-related support, clients should use the official

Maztaa Support Chat: <https://whop.com/maztaa-indol/support/>

Website: <https://maztaa-indol.vercel.app>

Country: India
